### EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

#### A) In the Title

Title replaced with: --Manufacturing method of semiconductor module including solid-liquid diffusion joining steps--

### Rejoinder of Claims

Claim 1, 6-16 are directed to an allowable product. Pursuant to the procedures set forth in MPEP § 821.04(B), claims 2-5, directed to the process of making or using an allowable product, previously withdrawn from consideration as a result of a restriction requirement, are hereby rejoined and fully examined for patentability under 37 CFR 1.104.

Because all claims previously withdrawn from consideration under 37 CFR 1.142 have been rejoined, **the restriction requirement as set forth in the Office action mailed on 3 April 2009 is hereby withdrawn.** In view of the withdrawal of the restriction requirement as to the rejoined inventions, applicant(s) are advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may

Art Unit: 2823

be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once the restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

### Reasons for Allowance

The following is an examiner's statement of reasons for allowance: the features in claim 1, lines 6-18,

“a second joining step for joining the front-surface-side die electrodes of the semiconductor die and one ends of linear or plate-like connecting members; and

a third joining step for joining another ends of the connecting members and second circuit electrodes which are formed on the circuit board;

wherein each of the first joining step, the second joining step and the third joining step, a low-melting-point metal layer is preliminarily formed on at least one of a pair of conductive portions to be connected with each other and, thereafter, the pair of conductive portions are arranged to face each other and are heated and pressurized at a temperature which melts at least the low-melting-point metal thus diffusing the low-melting-point metal layer into the pair of conductive portions by solid-liquid diffusion whereby the pair of conductive portions are joined to each other and

wherein the first joining step, the second joining step and the third joining step are performed sequentially,”

while known present a unique combination. The prior art of record fails to teach, in combination, the process features.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
